

Key Responsibilities - Heavy Duty Mechanic, The Patchmaster Ltd.

At The Patchmaster Limited, our focus is helping clients with the economical preservation of their roads in Western Canada. We do this with in-depth industry knowledge, a track record for performance, and strong business acumen and leadership. We focus on preserving safe, economically proven, and environmentally friendly pavement strategies.

We believe our people, relationships, and safety culture differentiate us in the market to be industry leaders in spray injection patching and pavement preservation.

Reporting to the Chief Operating Officer at The Patchmaster Limited, the Heavy Duty Mechanic is responsible for maintaining a fleet of Spray Patch Trucks, Elgin Street Sweeper, Packers, Excavator, Kenworth Semi, and miscellaneous equipment like Trailers. Additional requirements are outlined below. **This position is a full-time contract from April to November based in Okotoks, Alberta with the potential to be extended to full-time. We offer full benefits for employees and their dependents.**

- Be a demonstrated safety leader and foster a safety culture with all employees, contractors, and visitors.
- Maintain, repair, and provide diagnostics of heavy vehicles and industrial heavy equipment.
- Ability to engage and communicate with vendors or outside mechanic contractors for parts and mechanical support.
- Ability to manage multiple priorities and projects remaining focused on safety and efficient operations.
- Lead and document a preventative maintenance program for all heavy vehicles and construction equipment about The Patchmaster operations.
- Provide overhauls and rebuilds in the off-season as required.
- Develop and maintain relationships with key vendors and part suppliers.
- Manage the shop and inventory of spare/critical spares. Ensure a safe workplace for all Patchmaster Ltd. employees.
- Work with leadership to identify areas of improvement, efficiency, and safety to enhance safe and effective operations.

Requirements

- Knowledge of municipal and provincial road construction and requirements.
- Read, interpret, and understand job specifications and scope requirements.
- Participate in and apply all The Patchmaster Ltd policies and procedures to jobs.
- Able to interpret technical and diagnostic requirements and documents related to equipment.
- Strong troubleshooting skills.
- Strong interpersonal skills in communicating with vendors and other employees.
- Able to complete safety requirements such as hazard assessments and daily safety meetings.

Skills

- A high school diploma (GED). Postsecondary education is considered an asset.
- Valid driver's license (Class 3 or 5 with Air Brakes) with a recent 3-year abstract.
- Proven technical training i.e.) Heavy Duty Mechanic Journeyman or Technician.
- Valid first aid certification including CPR is an asset.
- Any other safety certifications are an asset.
- Previous experience in heavy equipment maintenance.
- Previous road maintenance and heavy construction maintenance experience.
- Must be able to work long shifts up to 12 hours including night shifts.
- Able to work overtime hours when required.
- Have a willingness to work physically in a team environment by assisting co-workers with other duties as needed.
